HEATHER GLEN COMMUNITY SERVICES DISTRICT

PUBLIC NOTICE

Fire Hydrant Flushing – November 2026

Heather Glen Community Services District will conduct routine fire hydrant flushing throughout the District during November 2026 as part of ongoing water system maintenance.

During this process, residents may observe water flowing from fire hydrants and along roadsides. This is a normal part of the maintenance process and does not indicate a water system issue.

Residents may also experience temporary water discoloration or fluctuations in water pressure while flushing is underway.

Thank you for your patience and understanding.
